**SECOND GRADE: 1st Place**

**"Lunar Living"**

**by Claire**

Doral Academy

One day in class, I find myself looking out the window at the waves and I wonder what it will be like to live on the moon. My name is Carl, and my parents are looking for a new house in Hawaii.

First, I go to get some builders to help me build my house on the moon. Then I will tell them about my idea. The guy is all like, "What!"

Then I go get a rocket ship from my dad's shop, so the builders could fly up to the moon. And I tell them that I want the craters to be pools and hot tubs. Also, I want there to be cameras to watch the shooting stars.

The house is now starting to get built. They have to build the house really secure in the moon because of gravity. They're getting big tanks full of water for the hot tubs and pools.

Finally, the house is finished and my house is the hot spot of 3rd grade. Also, I made some new friends. Their names are Bob, Joe, and Gilbert. We sometimes even go visit earth.
